

All THE ANSWERS You Need.

To get paid fast. And to remove up to 90 percent of claims from manual follow up.

No more spending hours of staff time trying to decipher why some claims were denied. Or wasting time chasing claims that have already been approved for payment. ClaimStatusPlus™ replaces endless question marks with answers, often within a few days of claim submission. Best of all, you can get the answers delivered inside the systems you use most, eliminating technology hassles and streamlining your team's workflow. Regardless of how, where or in which system you process claims, ClaimStatusPlus operates as an intelligence feed, delivering detailed and timely answers on claims status including the precise reason for denial. And it eliminates continuous manual follow-up on the approximately 90 percent of claims that have already been approved, freeing staff to focus on remediation rather than follow-up.

Do the Math.

Believe it or not, back office staff spend more time following up on claims that are already going to be paid than on remediating those that were denied. Imagine the savings if that wasted time could be eliminated by identifying approved claims earlier. For Recondo's ClaimStatusPlus customers, the savings are big. That's not even counting improvements to cash flow now that claim remediation is also significantly faster.

Lower the High Cost of Getting Paid.

Most healthcare organizations are paying for resources unnecessarily, just to get paid what they're owed. Overtime staff hours. Third party collectors. And in too many cases, account balance write-offs.

With ClaimStatusPlus, the solution is simple. ClaimStatusPlus drops straight into your preferred system and then works like it's been there forever. But don't take our word for it — do the math yourself. Scan the code to the right, or visit recondotech.com/csp for an ROI calculator that will show you in real dollars and hours how much ClaimStatusPlus can recoup for your organization.

Supercharge Your System with Recondo Intelligence

Hospital information systems make it easier to manage patient data. But imagine a system that could also automatically populate claim status fields. Or wrap up a patient registration with an accurate estimate of what the patient will owe. Those are just a couple of the highly manual tasks that Recondo intelligence feeds can automate within many widely used HIS and Revenue Cycle workflow applications, including:

- Epic
- McKesson
- Meditech
- Cerner
- Allscripts
- Artiva

Meet the Bot that BRINGS BACK THE ANSWERS.

It's highly intelligent. It never stops working. And no other claim status follow-up process is faster, easier or more complete than Recondo's patented ReconBot™ technology. ReconBots take the revenue cycle to the next level by automatically querying payer websites to retrieve, normalize and present information critical to claims follow-up. Built to handle unlimited information queries to multiple sources at once, ReconBots deliver answers that make conventional EDI look extremely weak by comparison.

Proprietary Intelligence

- Removes up to 90 percent of claims for manual follow-up
- Patented ReconBot technology delivers industry's most complete and current answers on claims status
- Automated intelligence closes claims set to be paid
- Problem accounts are prioritized and noted with payer-specific reason codes to make the account immediately actionable

Unmatched Technology

- Scales to accommodate large health system needs
- Easily integrates with most major HIS and Revenue Cycle workflow systems
- Queries and retrieves data from multiple sources to bring back complete answers

Proven Experience

- A portfolio of referenceable customers
- Credentialed access to 100+ payer portals in dozens of states
- More experience with obtaining and interpreting claims data than any other vendor

MONITOR

Continuous watch on hundreds of payer websites for answers

RETRIEVE

Identifies and grabs the right data
