

Take Authorization Management Out of Manual Mode

Big things happen for hospitals that replace manual authorization verification with Recondo's Auth-DP™ (Authorization Denial Prevention) data service. Very quickly, they improve revenue by hundreds of thousands or even millions of dollars. They also free up countless medical and administrative staff hours spent calling payers or checking payer websites to verify which procedures will be covered.

Auth-DP automates authorization processes.

- **Automated status verification.** Using Recondo's patented ReconBot™ technology, Auth-DP automatically queries payer websites for authorization information by payer/patient/procedure. It quickly returns with authorization status, number and expiration date in a fraction of the time manual checking takes.
- **Houses all the latest authorization rules from payers.** Say good-bye forever to the morass of spreadsheets and notebooks that almost always contain outdated information. With a library of more than 590,000 updated payer rules, Auth-DP users easily keep current with ever-evolving authorization requirements for different procedures.
- **Exception-Based Authorization Lists.** Now your staff has a worklist in hand that shows which scheduled procedures still require authorization from payers. Auth-DP can even fax the authorization request to physicians for follow up.
- **Flags and Generates ABNs & Non-Coverage Notices.** Finally, a Medical Necessity solution that goes beyond just Medicare. Auth-DP quickly detects and flags procedures that won't be covered by Medicare or commercial payers. If needed, Auth-DP generates ABNs and Notices of Non-Coverage to patients.
- **Minimizes Risk with Inpatient Admission Notification.** Additional features automatically notify payers of inpatient admissions, even during the middle of the night and on weekends.

Auth-DP Helps Hospitals:

- Significantly reduce denials and write-offs
- Accelerate cash flow
- Increase net revenue
- Optimize staff time
- Improve patient satisfaction

How Recondo Intelligence Makes Revenue Cycle Management Smarter

Hospital information systems are good at managing patient data. But imagine a system that can also automatically retrieve and present authorization status on every procedure. Or discover which claims are going to be paid or denied and the reasons for denial. Or wrap up a patient registration with an accurate estimate of what the patient will owe. Those are just some of the highly manual tasks that Recondo intelligence feeds can automate within widely-used HIS and Revenue Cycle workflow systems, including:

- Epic
- McKesson
- Meditech
- Cerner
- Allscripts
- Artiva

Meet the Bot that AUTOMATES AUTHORIZATION MANAGEMENT.

It's highly intelligent. It never stops working. Recondo's ReconBot technology breaks records and chains for Patient Access departments trapped in a mire of payer red tape. ReconBots take the revenue cycle to the next level by automatically gathering the latest information from payer websites and hospital information systems to present complete and coherent answers on authorization.

Proprietary Intelligence

- Removes most authorization tasks from manual intervention
- Credentialed access to 300+ payer portals in states across the country
- Patented technology retrieves authorization status on countless procedures in minutes—more than manual efforts could obtain in a year

Unmatched Technology

- Scales to accommodate large health system needs
- Easily integrates with most major HIS and Revenue Cycle systems
- Queries and retrieves data from multiple sources to bring back complete answers

Proven Experience

- A portfolio of recognized and referenceable customers
- More experience obtaining and interpreting authorization data than any other vendor
- Revenue cycle management solutions in active use at 900+ hospitals around the country

MONITOR

Continuous watch on hundreds of payer websites for answers

RETRIEVE

Identifies and grabs the right data

DISTRIBUTE

Knowledge verified and provided
Eligibility | Authorization | Claims Status

About Recondo Technology

Recondo empowers more than 900 hospitals and health systems with solutions that connect providers with over 90% of the nation's payers and their patients to ensure proper and accelerated payments across the care continuum. Our software and expertise streamline operations and achieve efficiencies and cost savings from patient access through claim status to payment processing. Visit us at www.recondotech.com
